A2B METRO

METRO

Experience a new kind of freedom

Welcome to A2B Metro, the electric bike that's taking transport in a whole new direction. With the A2B Metro you have the freedom to go your own way, to find new routes, beat the jams and save precious time.

The A2B Metro is brought to you by Ultra Motor, one of the world's leading developers of Light Electric Vehicles. We're passionate about creating new and interesting ways to go places that also help take care of the planet. The A2B Metro is the latest product from our innovation team that is powered by clean emissions technology.

Just launched in the UK, it's redefining the way we get to work, pop to the shops or just get some fresh air. Compared to jumping in the car, it's a lot more fun, easier to park and will reduce your fuel costs as well as your impact on the environment.

Riding is **believing**

Take the A2B Metro for a spin and you'll feel it immediately – the freedom that comes from being able to choose to pedal or cruise under power. Everything's easier, more fluid, more fun. It's not the same old journey any more; it's a voyage of discovery. Take the short cut or the scenic route – however you want to get from A to B, now there's a new way to do it.

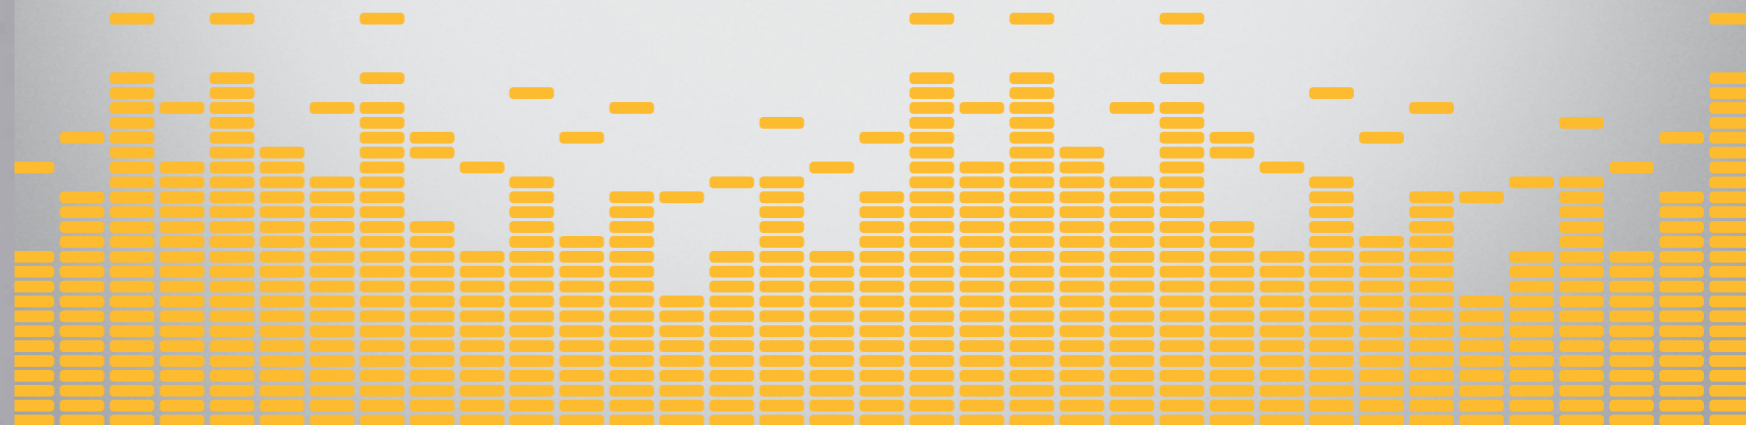

The motor is quiet,
the design speaks volumes.

The A2B Metro ride has silent acceleration, even when you're at full throttle. So you can really feel in touch with your surroundings and get back to enjoying the journey.

The most striking thing about the A2B Metro is definitely the design. But this is design with a purpose. Every element has been created with performance and enjoyment in mind – from the ergonomically engineered aluminium frame to the front and rear suspension to deliver effortless smooth cruising.

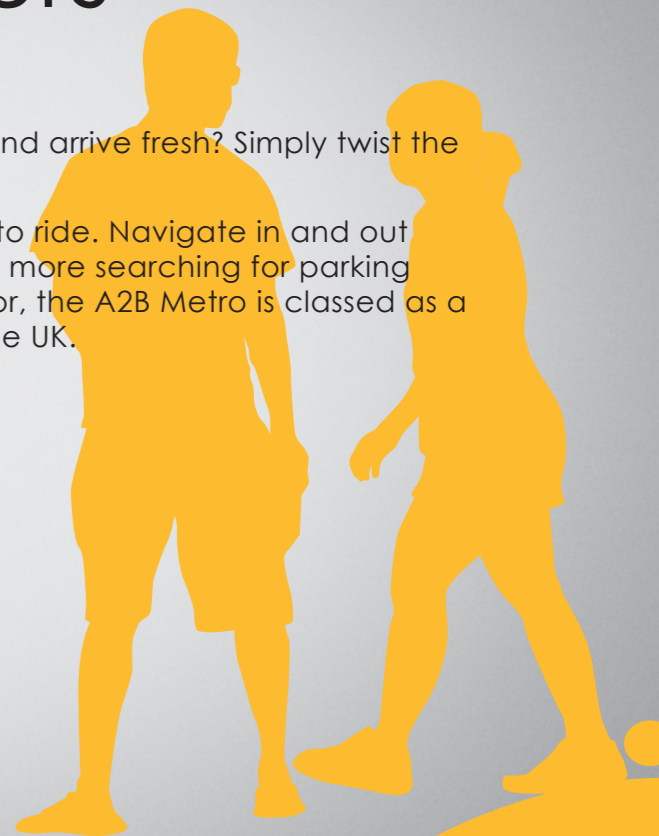

The choice is yours

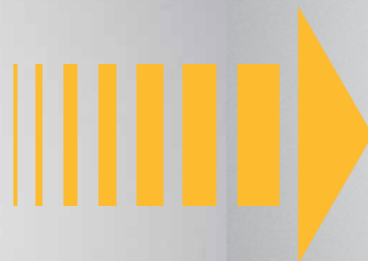

Feeling energetic? Use pedal power. Want to take it easy and arrive fresh? Simply twist the throttle and cruise along.

The 7-speed A2B Metro is incredibly easy and comfortable to ride. Navigate in and out of jams effortlessly with a twist of the throttle and there's no more searching for parking spaces when you get there. And even though it has a motor, the A2B Metro is classed as a bike so you don't need a licence to ride it on the road in the UK.

turn me ON

The A2B Metro offers power-on-demand acceleration with speeds of up to 15mph and its fully-charged battery can take you up to 20 miles.* Charging costs as little as 7p and the battery can easily be charged overnight – simply remove the detachable lithium ion battery and use the charging cable to plug it into any wall socket. There's also the option to buy an integrated secondary battery pack which can as much as double your range.

Buy an A2B Metro and you'll find you're leaving the car at home much more often. As well as spending less on fuel and parking charges, you'll also be doing your bit to look after the planet. Which means no matter which colour A2B Metro you choose, it's bound to be green.

*Depending on rider weight, amount of pedalling and terrain

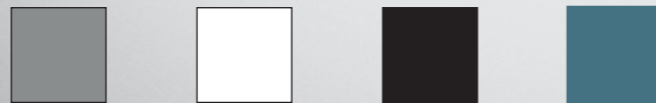

Why everyone is going A2B™

- No sweat.** Cruise with the motor and arrive fresh as a daisy
- Comfy.** Oversized seat and front and rear suspension
- Nippy.** Navigate in and out of the traffic with ease
- Economical.** A 7p charge takes you up to 20 miles*, and no parking charges
- Eco-friendly.** Cut down on car journeys and reduce your carbon footprint
- Quiet.** Even under power, you can really feel part of the world around you
- Flexible.** Add extras such as panniers to create the A2B that suits your lifestyle
- Design.** Form and function come together in the A2B to create a unique riding experience

Your colour choices: silver, white, black and blue.

*Depending on rider weight, amount of pedalling and terrain
